

The PleuralPort, a subcutaneous access port, is designed for veterinary patients to provide a more comfortable way of gaining repeated access to the their pleural cavity for both the delivery of medications (including fluids) and for the withdrawal of pleural effusions.

Available in 2 sizes, Le Grande for dogs - PP-102K, and Le Port for cats - PP-202K, it is surgically placed during a short procedure. Using a PleuralPort eliminates the need for repeated entry into the pleural space for each treatment, and avoids the problems created by an exit site wound. With the PleuralPort, drainage is more efficient and more comfortable for the patient. Access to the pleural cavity is by penetration of the port septum with a specially designed non-coring needle - the Huber point needle. Benefits of the PleuralPort include its subcutaneous location and more efficient fluid drainage.

## COMPONENTS OF THE PLEURALPORT KIT

### ACCESS PORT

Positioned subcutaneously and connected to the drainage catheter, the port chamber is covered by a rigid silicone 'window', or septum, and serves as the point of entry for intracavitary access.

- allows percutaneously controlled infusion into or withdrawal from the pleural cavity

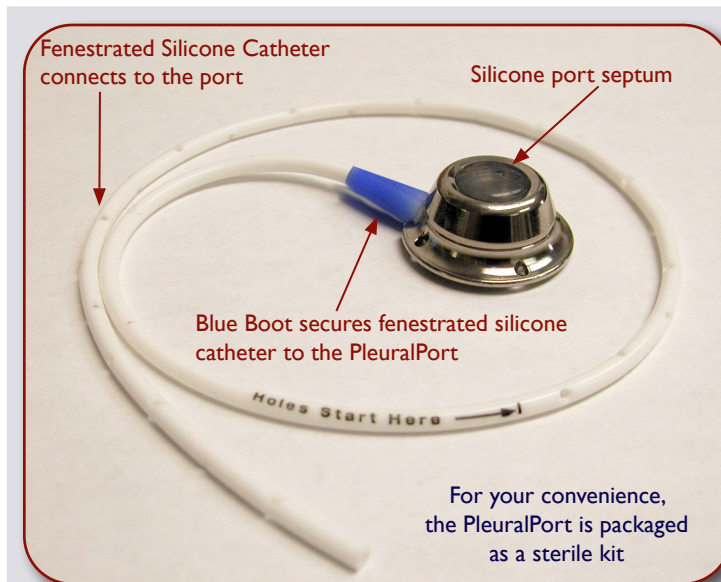

Available to suit all sizes of canine and feline patients

- is low profile, lightweight, biocompatible shape & material

### DRAINAGE CATHETER

Radiopaque silicone catheter with fenestrations/drainage holes in 2 sizes

- provides entry into the pleural system

### PLEURALPORT KIT CONTENTS

- 1 x PleuralPort, with blue boot
- 1 x Fenestrated Silicone catheter
- 1 x 22 gauge x 1" Huber point needle to access the PleuralPort
- 1 x 20 gauge x 1" Huber point needle to access the PleuralPort
- 1 x 19 gauge x 1" Huber infusion set to access the PleuralPort

Surgical Suggestions

Accessing Guide

**The PleuralPort is a welcome solution to the management of pleural effusions in veterinary patients.**

For Veterinary Use Only

SUPPLIED STERILE

## INDICATIONS FOR USE OF THE PLEURALPORT

- repeated aspiration of pleural effusions
- delivery of intracavitary chemotherapy

## BENEFITS OF THE PLEURALPORT

- safe, well tolerated and clinically proven
- more comfortable than a conventional thoracostomy tube
- easily located by touch under the skin
- eliminates inflammation and pain usually associated with repeated thoracocentesis
- subcutaneous location reduces infection risk
- minimal maintenance required
- eliminates risk of pulmonary damage associated with repeated thoracocentesis
- owners can be taught to aspirate effusions at home
- 100% biocompatible materials designed not to degrade over time

*no more  
poking & proding  
to remove effusions*

## ORDERING INFORMATION

Catalog Number	Product Description
PP-102K - Le Grande Kit Canine PleuralPort Kit for larger dogs	<ul style="list-style-type: none"> <li>- 1 x large titanium access port</li> <li>- 1 x 9 Fr. radiopaque, fenestrated silicone catheter</li> <li>- 22Ga. x 1" PosiGrip Huber point needle (PG22-100)</li> <li>- 20Ga. x 1" PosiGrip Huber point needle (PG20-100)</li> <li>- 1 x 19Ga. x 1" ClearView Huber point infusion set (CVRA19-100-6)</li> <li>- Surgical Instructions &amp; Accessing Guide</li> </ul>
PPX-10 (optional) Canine PleuralPort Introducer Kit	<ul style="list-style-type: none"> <li>- 1 x 10 Fr. Peel-Away introducer/dilator set</li> <li>- 1 x 18 gauge x 2.50" over-the-needle catheter</li> <li>- 1 x 18 gauge x 2.75" introducer needle</li> <li>- 1 x 0.035" x 45cm J-tipped guidewire</li> <li>- 1 x 10cc syringe</li> </ul>
PP-202K - Le Port Kit Feline PleuralPort Kit for cats & small dogs	<ul style="list-style-type: none"> <li>- 1 x large titanium access port</li> <li>- 1 x 7 Fr. radiopaque, fenestrated silicone catheter</li> <li>- 22Ga. x 1" PosiGrip Huber point needle (PG22-100)</li> <li>- 20Ga. x 1" PosiGrip Huber point needle (PG20-100)</li> <li>- 1 x 19Ga. x 1" ClearView Huber point infusion set (CVRA19-100-6)</li> <li>- Surgical Instructions &amp; Accessing Guide</li> </ul>
PPX-8 (optional) Feline PleuralPort Introducer Kit	<ul style="list-style-type: none"> <li>- 1 x 8 Fr. Peel-Away introducer/dilator set</li> <li>- 1 x 18 gauge x 2.50" over-the-needle catheter</li> <li>- 1 x 18 gauge x 2.75" introducer needle</li> <li>- 1 x 0.035" x 45cm J-tipped guidewire</li> <li>- 1 x 10cc syringe</li> </ul>
TFL-1202 (optional) - T-FloLoc™ Port Locking Solution	- 10 x 2ml 2% Tetra-EDTA Solution in 12mL Syringe

*Huber needles, infusion sets, and accessories for accessing & maintenance of the PleuralPort can be ordered as well. Visit [www.norfolkvetproducts.com](http://www.norfolkvetproducts.com) for more details.*
