

Save more on the Instruments you use every day

Did you know that purchasing a Veterinary Instrumentation (Vi) Kit can offer significant savings compared to buying the individual instruments separately?

Designed by veterinary professionals and tailored to common surgical procedures, Vi Kits provide a convenient, cost-effective way to equip your practice with the instruments you need, while ensuring consistency and quality across every procedure.

For a limited time, we're making these savings even greater with an additional 15% off selected Vi Kits. Whether you're replacing existing instruments, expanding your surgical capabilities, or equipping a new team member, there's never been a better time to invest in high-quality surgical instrumentation while maximising your budget.
